AI/ML ENGINEER

PROFESSIONAL SUMMARY

Applied AI Engineer and Full Stack Developer with 8+ years of experience building production-grade AI systems, scalable backend architectures, and cross-platform web/mobile solutions. Experienced in machine learning, RAG workflows, cloud deployment, and end-to-end software development using Python, PyTorch, TensorFlow, React, Node.js, Flutter, AWS, and GCP. Proven track record of improving model performance, automating workflows, and delivering AI-powered solutions that drive efficiency and measurable business impact.

Areas of Expertise: AI Systems Engineer | Full Stack Development | Cyber Security Specialist

EDUCATION

Montclair State University (MSU), Montclair, NJ USA

Master of Science in Data Science

Aug 2024 - May 2026

GPA: 3.7/4.0

Relevant Coursework: Machine Learning, Deep Learning, Data Mining, NLP, EDA, Advanced Statistics, Big Data

SZABIST Institute of Science & Technology, Karachi, Pakistan

Bachelor of Science in Computer Science

Aug 2019 - May 2023

GPA: 3.5/4.0

Relevant Coursework: Software Engineering, Database Systems, AI, Data Science, Data Structures, Networking

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript, Java, C, C++, Kotlin, SQL
- **Machine Learning & AI:** PyTorch, TensorFlow, Scikit-learn, XGBoost, BERT, NLP, Computer Vision, Model Training, Model Evaluation, Hyperparameter Tuning, Feature Engineering, Ensemble Methods, RAG (Retrieval-Augmented Generation), Deep Learning
- **Data Engineering:** ETL Pipelines, Apache Spark, Data Preprocessing, Data Modeling, EDA, Data Visualization, Data Quality Management, Experimentation
- **Backend Development:** Node.js, Django, REST APIs, GraphQL, Microservices, Authentication (OAuth, JWT), Sessions, API Integration, Caching (Redis), System Design
- **Frontend & Mobile:** Flutter (iOS/Android), React.js, Next.js, JavaScript, HTML5, CSS3, Responsive Design, Cross-Platform Development, Kotlin
- **Databases:** PostgreSQL, MySQL, MongoDB, Cassandra, MariaDB, Firebase, Redis, GCP Databricks, Data-Lakes
- **Cloud & DevOps:** AWS, Google Cloud Platform (GCP), Docker, Kubernetes, Git, CI/CD, Jupyter, Google Colab, Cloud Functions, Serverless Architecture
- **Analytics & Visualization:** Tableau, Power BI, Matplotlib, Seaborn, Plotly, Statistical Analysis
- **Tools & Collaboration:** Jira, Trello, Slack, Figma, LucidCharts, Agile/Scrum, Git/GitHub

PROFESSIONAL EXPERIENCE

Kodensoft, Saddle Brook, NJ, USA

Jan 2025 – May 2026

AI / ML Engineer

- Developed scalable backend microservices for Flutter and web applications, improving system performance and maintaining 95% uptime
- Built machine learning models, including classification and recommendation systems, to personalize user experiences and increase order conversion rates
- Designed and optimized AI-powered workflows, including RAG pipelines, orchestration layers, and multi-agent systems, for ecommerce, healthcare, and voice AI use cases
- Improved model accuracy and reliability through structured testing, ensemble learning, and system optimization, reducing hallucinations and strengthening production performance
- Built and refined AI voice agent workflows integrated with Square, Toast, Clover, OpenTable, and Google Cloud for high-accuracy automated business operations
- Developed real-time dashboards, analytics reports, and stakeholder-facing visualizations using Python, Plotly, Folium, and EDA techniques to monitor KPIs, trends, forecasting, and system performance
- Automated operational and document-heavy workflows using Python scripts and API integrations, reducing manual processing time and improving efficiency

Kore Digital, Karachi, Pakistan

Sep 2022 – Aug 2024

Data Engineer

Oct 2023 – Aug 2024

- Designed and implemented ETL data pipelines and data models to support lead generation systems, analytics systems, and downstream machine learning applications
- Interactive business intelligence dashboards in Tableau and Python visualization libraries (Matplotlib, Seaborn, Plotly) to deliver actionable insights to stakeholders and executive teams
- Conducted exploratory data analysis (EDA), statistical modeling, and trend analysis on large-scale datasets using Python (Pandas, NumPy) to identify patterns and support strategic decision-making
- Implemented data quality frameworks including data cleaning, preprocessing, validation, and transformation workflows to ensure dataset integrity and reliability for analytics pipelines
- Collaborated with product and engineering teams to design data-driven solutions, validate hypotheses, and iterate on risk mitigation strategies to improve system reliability
- Presented technical findings, analytical reports, and data-driven recommendations to cross-functional stakeholders through clear documentation and executive summaries

Full Stack Developer

Sep 2022 - Oct 2023

- Developed production web applications using modern JavaScript frameworks (React.js, Next.js) and Node.js backend, achieving 25% increase in user engagement through optimized UI/UX design and scalable architecture
- Translated complex business requirements into technical specifications and system design documents, reducing development cycle time by 30% through improved team collaboration and modular code implementation
- Full-stack e-commerce platforms with POS system integration (APIs, webhooks) to manage real-time inventory tracking, payment processing, billing workflows, and order management systems
- Collaborated in Agile/Scrum environment with cross-functional teams (engineering, product, marketing) to deliver feature releases, conduct code reviews, and maintain CI/CD pipelines
- Designed system architecture and database schemas (PostgreSQL, MongoDB) for scalable, maintainable applications following best practices in RESTful API design and microservices patterns
- Engaged with stakeholders to gather requirements, define project scope, estimate timelines, and deliver technical solutions aligned with business objectives

Koretechx Digital, Florida, USA (Remote)

Jun 2020 – Aug 2022

Web Developer

- Developed and maintained full-stack web applications using React.js, Node.js, and various database systems, strengthening proficiency in responsive UI/UX design and production deployment workflows
- Optimized cloud infrastructure connectivity and deployment pipelines, improving deployment efficiency by 30% through CI/CD workflows and modern web technologies

Rockstar Games, Pakistan (Remote)

Jun 2010 – Dec 2014

Game Developer · Freelance / SA-MP Multiplayer Platform

- Developed server-side game logic and scripting systems (Pawn language) including user authentication, role-based access control (RBAC), progression systems, subscription management, and real-time player state persistence
- Architected and managed end-to-end multiplayer server infrastructure (Linux hosting, FTP, database design, logging/monitoring, community forums) scaling to 100+ concurrent daily active users with high availability

PROJECTS & RESEARCH

AI-Driven Cybersecurity Defense System | Master's Thesis

2025

- Developed an AI-based vulnerability triage system using XGBoost, BERT, RankFusion, and RAG to predict CVE exploitability, support security analysis, and automate validation workflows.

Kallin.ai – AI Voice Ordering Platform

2025

- Built a voice-based restaurant ordering platform using Flutter, FastAPI, Redis, and NLP workflows for real-time order capture, session handling, and backend automation.

MyMoveAdvisor – Moving Services Marketplace

2025

- Developed a full-stack marketplace using React.js, Node.js, WebSockets, and Google Cloud APIs to connect users with verified moving service providers.

Video CV Mobile Application | SZABIST Final Year Project

2023

- Built an Android application using Java and Kotlin for creating and sharing short-form video resumes; ranked 2nd in the university-wide final year project.

CERTIFICATIONS & PUBLICATIONS

- IEEE Paper Publication
- Analytics with SQL and Python
